1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 9 and 10 provide for the use of acid anhydrides, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 9 and 10 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

2. Claims 4, 7 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 7 and 8 are confusing because they depend from a cancelled claim.

Claims 4, 7 and 8 are confusing because they depend on the process of claim 1, however, claim 1 is a mixture claim.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

Art Unit: 1711

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4, 7-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Hicks, Lauri or Smith.

Hicks (GB 2,196,974) discloses mixtures comprising polyisocyanate prepolymers and anhydrides (see examples) in the amounts of the claims. He discloses suitable anhydrides (page 1, lines 45-50), and he teaches the use of these mixture for making polyisocyanate addition products.

Lauri (039) discloses (see example 1) mixtures of polyisocyanates and an anhydride in the amounts of the claims. He uses this mixture to make polyisocyanate addition products.

Smith (414) discloses mixtures of polyisocyanates and anhydrides in the amounts of the claims (see Table 4). He uses this mixture to make polyisocyanate addition products.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rachel Gorr whose telephone number is (703) 308-3608. The examiner can normally be reached on Mon.-Fri., from 7:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jim Seidleck can be reached on (703) 308-2462. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9310 for regular communications and (703) 872-9311 for After Final communications.
